Attributes Introduction

user

JS user.js > ...

```
1  import mongoose from "mongoose";
2
3  //使用者table
4  const userSchema = mongoose.Schema({
5    id: { type: String ,unique:true}, //primary key
6    token: { type: String ,unique:true}, //google api 回傳的此使用者的代碼（驗證用）
7    name: { type: String, required: true }, //（取自google api）
8    email: { type: String, required: true }, //（取自google api）
9    password: { type: String, required: true }, //如果是使用google api登入的,則此欄位為空
10   picture: { type: String }, // 人物頭像圖(取自google api)
11   nickname: { type: String },// 暱稱
12   loginChannel: { type: String }, //使用者的登入管道
13   isValid: { type: String }, //是否通過信箱驗證
14   isBanned: { type: String }, //是否被ban
15   likes:[String], //使用者收藏的課程id陣列
16   thumbups:[String] //使用者按讚的評價（feedback）id陣列
17 });
18
19 export default mongoose.model("User", userSchema);
```

userPost

JS userPost.js > ...

```
1  import mongoose from 'mongoose';
2
3  ∨ const postSchema = mongoose.Schema({
4    id:String, //PK
5    title: String, //標題
6    message: String, //內文
7    name: String, //使用者名稱
8    creator: String, //使用者id (FK)
9    selectedFile: String, //貼文圖 (只有一張) (<16mb的檔案在mongodb裡可用字串存)
10   num_of_likes: Number, //讚數
11   comments: { type: [String], default: [] }, //留言陣列
12  ∨   createdAt: {
13     type: Date,
14     default: new Date(),
15   }
16  })
17
18  var PostMessage = mongoose.model('PostMessage', postSchema);
19
20  export default PostMessage;
```

course

JS course.js > ...

```
1 import mongoose from 'mongoose';
2 const { Schema } = mongoose;
3
4 //想要override _id 失敗 只好把原本的id值存到course欄位
5 const courseSchema = mongoose.Schema({
6   id: { type: String, unique: true }, //primary key()
7   semester: { type: String }, //學期(共四碼：)e.g. "1101"代表110學年上學期 前三碼代表學年 第四碼代表上或下學期
8   code: { type: String }, //由政大編碼的九碼課程id (取自課程查詢下載的excel檔)
9   point: Number, //學分 (取自課程查詢下載的excel檔)
10  courseNameZH_TW: { type: String }, //課程名稱 (中文) (取自課程查詢下載的excel檔)
11  courseName: { type: String }, //課程名稱 (取自課程查詢下載的excel檔)
12  instructorZH_TW: { type: String }, //教師名稱 (取自課程查詢下載的excel檔)
13  instructor: { type: String }, //教師名稱 (取自課程查詢下載的excel檔)
14  departmentZH_TW: { type: String }, //開課單位 (取自課程查詢下載的excel檔)
15  department: { type: String }, //開課單位 (取自課程查詢下載的excel檔)
16  sessionZH_TW: { type: String }, //上課時段 (取自課程查詢下載的excel檔)
17  session: { type: String }, //上課時段 (取自課程查詢下載的excel檔)
18  classroom: { type: String }, //上課教室 (取自課程查詢下載的excel檔)
19  typeOfCredit: { type: String }, // (取自課程查詢下載的excel檔)
20  lectureLanguage: { type: String }, //教學使用語言 (取自課程查詢下載的excel檔)
21  isCoreGeneral: { type: String }, //是否為核心通識 (取自課程查詢下載的excel檔)
22  information: { type: String }, //詳細資訊 (取自課程查詢下載的excel檔)
23  note: { type: String }, //課程註解 (取自課程查詢下載的excel檔)
24  comments: { type: [String], default: [] }, //此課程的評價陣列
25  avg_rate: Number, //此課程的平均評價
26  avg_sweet: Number, //此課程的平均甜度
27  avg_loading: Number, //此課程的平均涼度
28  avg_gain: Number, //此課程的平均收穫
29  num_of_feedback: Number, //此課程的評價數
30  type: { type: String }, //此課程的種類：有以下幾種["DEPARTMENT", "GENERAL", "INTEGRATED", "PE", "ND"]
31  subType: { type: String }, //此課程的子種類 列舉如下
32  // type為"DEPARTMENT" 的有以下幾種subtype:["CHINESE", "COMPUTER_SCIENCE"...]
33  // type為"GENERAL" 有以下幾種subtype:["SOCIAL", "HUMANITY", "ENGLISH"...]
34  // type為"INTEGRATED" 有以下幾種subtype:["CALCULUS", "CIVIL_LAW"...]
35  // type為"PE"(體育) 目前沒有subtype subtype值為""
36  // type為"ND"(國防) 目前沒有subtype subtype值為""
37  short_code: { type: String } //此課程的短id code的前三碼
38 })
39
40
41 var Course = mongoose.model('Course', courseSchema );
42
43 export default Course;
44
```

courseFeedBack

JS courseFeedBack.js > ...

```
1  import mongoose from 'mongoose';
2
3  const courseFeedBackSchema = mongoose.Schema({
4    id:String, //(PK)
5    rate: Number, //評價
6    sweet: Number, //甜度
7    loading: Number, //涼度
8    gain: String, //收獲
9    introduction: String, //懶人包
10   description: String, //評價內容
11   user: String, //使用者id
12   user_nickname: String, //使用者暱稱
13   course: String, //課程id (FK)
14   course_semester: String, //e.g. "1101"
15   course_code: String, //由政大編碼的九碼課程id
16   num_of_thumbsup: Number, //按讚數
17   createdAt: {
18     type: Date,
19     default: new Date(),
20   },
21   updatedAt: {
22     type: Date,
23     default: new Date(),
24   }
25 })
26
27 var CourseFeedBack = mongoose.model('CourseFeedBack', courseFeedBackSchema );
28
29 export default CourseFeedBack;
```

courseResource

JS courseResource.js > ...

```
1  import mongoose from 'mongoose';
2
3  const CourseResourceSchema = mongoose.Schema({
4    id:String, // (PK)
5    introduction: String, // 懶人包
6    description: String, // 課程資源描述
7    user: String, // 使用者id (FK)
8    user_nickname: String, // 使用者暱稱
9    file_photo:String, // 封面照
10   file1: String, // 檔案1
11   file2: String, // 檔案2
12   file3: String, // 檔案3
13   course: String, // 課程id (FK)
14   course_semester: String, // 學期(4碼) e.g."1101"
15   course_code: String, // 科目代碼
16   num_of_thumbsup: Number, // 按讚數
